Seeking a challenging role in the software industry where I can apply my technical expertise, creativity, and strong analytical skills to contribute effectively to innovative projects and collaborate with talented teams. Organized and dependable candidate successful at managing multiple priorities with a positive attitude. Willingness to take on added responsibilities to meet team goals.

PROFESSIONAL EXPERIENCE

Tech Magify LLP

Intern

Assisted staff members in their daily tasks, reducing workload burden and allowing for increased focus on higher priority assignments. Gained valuable experience working within a specific industry, applying learned concepts directly into relevant work situations.

PROJECTS

BriefBird

Developed a web-based text summarizer using the BART model for natural language processing, allowing users to quickly generate concise summaries from lengthy text documents.

Bangalore Home Price Prediction

Built a machine learning model using Flask to predict home prices in Bengaluru based on factors like location, size, and amenities, offering users data-driven insights for real estate decisions.

Resume Builder

Designed and developed a dynamic resume builder in PHP, allowing users to select from multiple templates and customize their resumes by filling out forms with personal and professional details.

Python IDE

Built a simple but effective Python IDE using Tkinter, featuring an interactive interface for code writing, running, and debugging, aimed at beginner programmers.

Hotel Management Website

Developed a comprehensive hotel management system using Laravel, enabling room bookings, cancellations, and admin management, while providing an intuitive user interface for both guests and administrators.
